Experience

Front-End Engineering Intern @ Facebook
January 2017 - April 2017

Front-End Engineering Intern @ Dispatch
April 2016 - Present

Migrated legacy Meteor app using ReactJS and Redux via a reusable component architecture. Contributed to Kitchen Sink open source project that allows isolated development of ReactJS components. Started migration of legacy Cordova app to React Native. Worked on dispatch CLI tool to build, deploy and run apps using Docker images to Rancher.

Front-End Engineering Co-op @ Intuit
June 2015 - December 2015

Used AngularJS, NodeJS and Falcor to create a microservice web application for AWS deployment solutions on developer operations team. Released Continuous Deployment Dashboard 2.0, a one-click tool to create and manage AWS Jenkins deployments.

Software Engineering & Design Intern @ Attend.com
April 2014 - September 2014

Worked closely with the core app team for development and design of web pages using jQuery and Bootstrap.
